Head diameter
Overall length
Thread size

Grip range

Defines the range of total thickness of the customers part (even if it consists of more than one layer)

Hole geometry

If round → diameter
 If hexagonal → width across flats

Head projection after setting

Variable according to the application (setting load, material substrate, etc.)

Blind side projection after installation

Defines the clearance needed on the blind side (cannot be used for quality control)

Setting stroke

Difference of total length before and after installation
